You're Doing a Great Job

To improve your mood instantly, look in the mirror and give yourself a compliment.

Be Mindful of Missed Calls

If you notice a missed call from an unknown phone number, resist the urge to satisfy your curiosity and call back. Scammers can spoof numbers that look similar to ones you regularly call in the hopes you'll answer. When you return the call, it verifies that a person is assigned to your phone number, prompting the scammer to try again another time.

Smitten With Gloves

Gloves have long been associated with romance. Knights were said to carry the glove of a sweetheart in their helmets to bring them good luck. In Victorian England, a suitor would gift a pair of gloves to the girl of his dreams, who'd wear the gloves in public if she returned his affections. And a Latvian tradition calls for brides to fill a hope chest with hundreds of handmade mittens as a sign of devotion.

Red Barber's Ballgames

With down-home, Southern charm and a knack for vivid play-by-plays, Walter Lanier "Red" Barber was a pioneer of sports broadcasting. From 1934 to 1966, he announced MLB and NFL games on the radio, mostly for New York teams. In an era before watching sports on TV was the norm, fans felt like they were in the stands thanks to Barber's keen descriptions and regular score updates prompted by an egg timer placed on the corner of his desk—a habit adopted by countless future announcers. Tip your ball cap to Barber on his birth anniversary, Feb. 17.

Wild World: Groundhogs

Every year on Groundhog Day, America's favorite weatherman appears. In honor of Punxsutawney Phil, share these facts about groundhogs.

"Groundhog" is the typical name for these animals, but they are also called woodchucks. Sometimes they are referred to as "whistle-pigs" due to the sound they emit when in danger. They forge intricate tunnels, which have many chambers and entrances and can be up to 50 feet long. Every year, groundhogs hibernate. Their temperature drops to around 40 F, and their breathing and heart rate slow dramatically.

Question: What flies around when it's born, lies still when it's living, and runs when its life is over?
