Change Puzzles for a Challenge

Word games and number puzzles help boost your brain power. But researchers say brainteasers stop forming new neural connections in your mind once you've mastered them. So if it takes you no time to complete a crossword, it may be time to try cryptograms or sudoku.

Take a Nap to Boost Your Brain

Whether you call it a catnap, a doze or a siesta, experts say getting a short snooze each day can enhance your memory. Sleep is an essential function in absorbing new information, because it allows the brain to clean out its short-term memory storage. Research confirms that daytime napping helps solidify new data and memories by moving them to the brain's long-term storage areas, where they can be retained for future use. Experts say just a 15- to 20-minute nap can be beneficial.
